The accompanying notes are an integral part of these condensed interim consolidated financial statements

1. NATURE AND CONTINUANCE OF OPERATIONS

Murchison Minerals Ltd. (the "Company" or "Murchison") was incorporated under the Canada Business Corporations Act on July 25, 2001. The principal business of the Company is the acquisition, exploration and evaluation of mineral property interests. The primary office is located at 120 Adelaide Street West, Suite 2500, Toronto, Ontario, Canada, M5H 1T1.

The condensed interim consolidated financial statements were approved by the Board of Directors on August 29, 2018.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that planned exploration and evaluation programs will result in profitable mining operations. The continuance of the Company is dependent upon completion of the acquisition of the exploration and evaluation properties, the discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying mineral claims, the ability of the Company to obtain necessary financing to complete the development and future profitable production or, alternatively, upon disposition of such property at a profit. Changes in future conditions could require material write downs of the carrying values of the Company's assets.

Although the Company has taken steps to verify title to its exploration and evaluation properties, in accordance with industry standards for the current stage of exploration of such property, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and noncompliance with regulatory and environmental requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, currency exchange fluctuations and restrictions and political uncertainty.

As at June 30, 2018, the Company has a cumulative deficit of $29,148,247 (December 31, 2017 - $27,231,143), continuing losses and is not yet generating positive cash flows from operations. These condensed interim consolidated financial statements were prepared on a going-concern basis in accordance with International Financial Reporting Standards ("IFRS"). Funding for operations has been obtained primarily through private share offerings. Future operations are dependent upon the Company's ability to finance expenditure requirements and upon the achievement of profitable operations. Management believes it will be successful in raising the necessary funding to continue operations in the normal course of operations; however, there is no assurance that these funds will be available on terms acceptable to the Company or at all. These condensed interim consolidated financial statements do not include adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue operations. Such adjustments could be material.

2. SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance

These unaudited condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, these unaudited condensed interim consolidated financial statements do not include all of the information and footnotes required by IFRS for complete financial statements for year-end reporting purposes.

Basis of consolidation

Subsidiaries are entities over which the Company has control, where control is defined to exist when the Company is exposed to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Subsidiaries are fully consolidated from the date control is transferred to the Company, and are de-consolidated from the date control ceases. During the period ended June 30, 2018, Pearl Mining Ltd. (Uganda) and Flemish Investments Ltd. (Uganda), both subsidiaries of the Company were dissolved and as at June 30, 2018, Flemish Investments Burundi SA (Burundi) was inactive and in the process of being dissolved.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

New accounting policies

IFRIC 23 – Uncertainty Over Income Tax Treatments ("IFRIC 23") was issued in June 2017 and clarifies the accounting for uncertainties in income taxes. The interpretation committee concluded that an entity shall consider whether it is probable that a taxation authority will accept an uncertain tax treatment. If an entity concludes it is probable that the taxation authority will accept an uncertain tax treatment, then the entity shall determine taxable profit (tax loss), tax bases, unused tax losses and credits or tax rates consistently with the tax treatment used or planned to be used in its income tax filings. If an entity concludes it is not probable that the taxation authority will accept an uncertain tax treatment, the entity shall reflect the effect of uncertainty in determining the related taxable profit (tax loss), tax bases, unused tax losses and credits or tax rates. IFRIC 23 is effective for annual periods beginning on or after January 1, 2019. Earlier adoption is permitted. At January 1, 2018, the Company adopted this amendment and there was no material impact on the Company's condensed interim consolidated financial statements.

3. CAPITAL MANAGEMENT

The Company manages its capital with the following objectives:

- to ensure sufficient financial flexibility to achieve the ongoing business objectives including funding of future growth opportunities, and pursuit of accretive acquisitions; and
- to maximize shareholder return through enhancing the share value.

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company may manage its capital structure by issuing new shares, repurchasing outstanding shares, adjusting capital spending, or disposing of assets. The capital structure is reviewed by management and the Board of Directors on an ongoing basis.

The Company considers its capital to consist of equity, comprising share capital, reserves and deficit which at June 30, 2018 totalled $1,739,454 (December 31, 2017 - $3,411,173). The Company manages capital through its financial and operational forecasting processes. The Company reviews its working capital and forecasts its future cash flows based on operating expenditures, and other investing and financing activities. The forecast is regularly updated based on its exploration and development activities. Selected information is regularly provided to the Board of Directors of the Company. The Company's capital management objectives, policies and processes have remained unchanged during the period ended June 30, 2018. The Company is not subject to any capital requirements imposed by a regulator or lending institution.

4. FINANCIAL RISK FACTORS

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate, foreign exchange rate and commodity price risk).

Risk management is carried out by the Company's management team under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management. There have been no changes in the risks, objectives, policies and procedures during the period ended June 30, 2018.

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash balances and amounts receivable. Cash is held with reputable banks, from which management believes the risk of loss to be remote. Financial instruments included in amounts receivable consist of sales tax receivable and refundable tax credits from government authorities in Canada. Management believes that the credit risk concentration with respect to financial instruments included in amounts receivable is remote.

4. FINANCIAL RISK FACTORS (Continued)

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at June 30, 2018, the Company had a cash balance of $1,976,322 (December 31, 2017 - $4,394,940) to settle accounts payable and accrued liabilities of $186,014 (December 31, 2017 - $122,862). All of the Company's financial liabilities generally have contractual maturities of less than 30 days and are subject to normal trade terms.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity prices.

Interest rate risk
The Company has cash balances and no interest-bearing debt. The Company's current policy is to invest excess cash in certificates of deposit or interest bearing accounts at major Canadian chartered banks. The Company periodically monitors the investments it makes and is satisfied with the creditworthiness of its Canadian chartered banks. Management believes that interest rate risk is minimal as cash and cash equivalents investments have maturities of three months or less.

Foreign currency risk
The Company's functional and presentation currency is the Canadian dollar. Certain expenditures are transacted in foreign currencies. As a result, the Company is exposed to fluctuations in these foreign currencies relative to the Canadian dollar. As at June 30, 2018, approximately $187,760 of cash was held in US dollars (December 31, 2017 - $194,487). Approximately $7,538 (December 31, 2017 - $930) of account payable was held in US dollars.

Commodity price risk
Commodity price risk could adversely affect the Company. In particular, the Company’s future profitability and viability of development depends upon the world market price of commodities. Commodity prices have fluctuated widely in recent years. There is no assurance that, even as commercial quantities of base and/or precious metals may be produced in the future, a profitable market will exist for them. A decline in the market price of commodities may also require the Company to reduce its mineral resources, which could have a material and adverse effect on the Company’s value. As at June 30, 2018, the Company is not a commodities producer. As a result, commodity price risk may affect the completion of future equity transactions such as equity offerings and the exercise of stock options and warrants. This may also affect the Company's liquidity and its ability to meet its ongoing obligations.

Sensitivity analysis

Based on management's knowledge and experience, the Company believes the following movements are “reasonably possible” over a one-year period:

(i) Based on cash and other working capital balances at June 30, 2018, held in currencies other than the Canadian dollar, a 10% change in the foreign exchange rates relative to the Canadian dollar would result in a corresponding foreign exchange gain or loss of approximately $19,500.

(ii) Based on cash balances at June 30, 2018, a 1% change in interest rates would result in a corresponding interest income change of approximately $17,900 for the one-year period.

(Expressed in Canadian Dollars)

5. CATEGORIES OF FINANCIAL INSTRUMENTS

	June 30 2018	December 31 2017
Financial assets:		
Loans and receivables		
Cash	$ 1,976,322	$ 4,394,940
Amounts receivable	-	-
FVTPL		
Investment	3,875	5,339
Financial liabilities:		
Other financial liabilities		
Accounts payable and accrued liabilities	$ 186,014	$ 122,862

As of June 30, 2018 and December 31, 2017, the fair value of all the Company's financial instruments approximates the carrying value, due to their short-term nature, except as disclosed in Note 7.

6. AMOUNTS RECEIVABLE AND PREPAID EXPENSES

	June 30 2018	December 31 2017
Sales tax receivable	$ 34,291	$ 26,124
Prepaid expenses and advances	8,954	13,122
	$ 43,245	$ 39,246

7. INVESTMENT

The Company's investment is classified as fair value through profit and loss ("FVTPL") and is carried at fair value. The balance is comprised of the following:

	Number of shares	June 30 2018	December 31 2017
First Mining Gold Corp.	8,612	$ 3,875	$ 5,339

The Company holds 8,612 (December 31, 2017 – 8,612) common shares of First Mining Gold Corp. The unrealized loss of $1,464 for the six month period ended June 30, 2018 (June 30, 2017 – $1,636) was recognized on the condensed interim consolidated statement of loss.

(Expressed in Canadian Dollars)

8. PROPERTY AND EQUIPMENT

	Exploration Equipment	Office Equipment	Total
December 31, 2017			
Opening net book amount	$ 180,000	$ -	**$ 180,000**
Dispositions	(180,000)	-	**(180,000)**
Closing net book amount (December 31, 2017 and June 30, 2018)	**$ -**	**$ -**	**$ -**

The Company sold its assets held for sale in February 2017 for $180,000.

9. EXPLORATION AND EVALUATION PROPERTIES

Canada

Brabant Lake Property – Saskatchewan

As at June 30, 2018, the Company held a 100% interest in certain claims forming the Brabant Lake property in Saskatchewan.

Pickle Lake Properties - Ontario

The Company holds a 51% interest in the Dorothy-Dobie Lake property and the Kasagiminnis property, both located in the Pickle Lake Greenstone Belt. The Company also has a 100% interest in the Pickle Lake Gold property which comprises certain claims acquired in 2009.

In June 2016 (with amendment on February 2, 2017), the Company entered into an agreement with White Metal Resources Corp. (“White Metal”) whereby White Metal can acquire all of the Company’s interest (“Earned Interest”) in its above Pickle Lake Gold properties . White Metal may exercise the option and acquire the Earned Interest by completing all of the following expenditures and cash payments:

(i) pay $10,000 in cash to Murchison at the signing of the agreement (received);

(ii) pay $15,000 in cash to Murchison 12 months from the date of the agreement (received);

(iii) pay $20,000 in cash to Murchison 24 months from the date of the agreement (received);

(iv) spend $1,200,000 over three years beginning on the date of the agreement as follows:

  i. complete a work commitment of $900,000 on or before the date which is twenty-four (24) months from the date of the agreement (with at least $250,000 on drilling);

  ii. complete a cumulative work commitment of $1,200,000 on or before the date which is thirty-six (36) months from the date of the agreement (with at least $700,000 on drilling).

(v) once the Earned Interest is completed, Murchison will be entitled to a 1% net smelter return (the “NSR”) of which fifty percent (50%) can be purchased by White Metal for $1,000,000 and the balance of the other fifty percent (50%) of the said NSR can be purchased for $1,500,000.

Upon completion of the option payments and expenditures, White Metal will deliver a notice to the Company setting out that it has exercised the option, and the date of the option notice shall be deemed to be the date in which White Metal’s Earned Interest in the properties pursuant to the option shall be effective, subject to the Murchison’s NSR.

(Expressed in Canadian Dollars)

9. EXPLORATION AND EVALUATION PROPERTIES (Continued)

On July 27, 2017, White Metal assigned its option and right to acquire the Earned Interest to Ardiden Ltd., an Australian exploration company.

In August 2014, the Company entered into an agreement with Frontline Gold Corporation ("FGC") and White Metal whereby FGC acquired 100% of the Company's 51% interest and the 49% interest held by White Metal in two claims known as the Pickle Lake East property. The claims will be subject to a 2% NSR (1% for the Company and 1% to White Metal for which 0.5% can be purchased for $500,000 from each of White Metal and the Company).

HPM Property - Quebec

As at June 30, 2018, the property consisted of 51 claims on which Pure Nickel Inc. has a 50% interest.

10. SHARE CAPITAL

(a) Authorized Share Capital

The Company's authorized share capital consists of an unlimited number of common shares with no par value.

(b) Issued

	Number of Shares		Amount
Balance – December 31, 2016 and June 30, 2017	**25,290,095**	**$**	**26,587,242**
Balance – December 31, 2017 and June 30, 2018	**42,543,214**	**$**	**28,802,248**

11. WARRANTS AND FINDERS' WARRANTS

The following summarizes the warrants and finders' warrants activity for the six months ended June 30, 2018 and June 30, 2017:

	Number of Warrants		Issue Date Fair Value		Weighted Average Exercise Price
Balance - December 31, 2016 and June 30, 2017	**7,818,000**	**$**	**783,346**	**$**	**0.30**
Balance - December 31, 2017 and June 30, 2018	**12,662,970**	**$**	**1,241,802**	**$**	**0.28**

As at June 30, 2018, the Company had warrants and finders' warrants outstanding as follows:

Date of Issue	Number of Warrants	Exercise Price ($)	Issue Date Fair Value ($)	Expiry Date
August 10, 2016	4,670,400	0.30	482,058	August 10, 2018
August 31, 2016	3,147,600	0.30	301,288	August 31, 2018
December 15, 2017	3,879,942	0.24	364,495	December 15, 2019
December 21, 2017	965,028	0.24	93,961	December 21, 2019
	12,662,970		**1,241,802**	

(Expressed in Canadian Dollars)

12. STOCK OPTIONS

The Company maintains a stock option plan whereby certain key employees, officers, directors and consultants may be granted stock options for common shares of the Company. The maximum number of common shares that is issuable under the plan was fixed at 10% of the number of common shares issued and outstanding (a maximum of 5% of the number of common shares issued and outstanding may be held by any one person). Options expire after a maximum period of five years following the date of grant. Vesting provisions are determined at the time of each grant.

The following summarizes the stock option activity for the six months ended June 30, 2018 and June 30, 2017:

	Number of Stock Options	Weighted Average Exercise Price
Balance - December 31, 2016	**2,308,300**	**$ 0.42**
Expired	(174,500)	0.70
Balance – June 30, 2017	**2,133,800**	**0.39**
Balance - December 31, 2017	**2,133,800**	**$ 0.39**
Issued [i]	1,435,000	0.19
Balance – June 30, 2018	**3,568,800**	**0.31**

(i) On January 10, 2018, the Company granted 1,435,000 stock options exercisable at $0.19 for 5 years to directors, officers and consultants of the Company. The grant date fair value of the these options of $245,385 was estimated using the Black Scholes valuation model with the following weighted average assumptions: risk free interest rate – 1.95%, expected volatility – 145%, expected dividend yield – 0%, expected forfeiture rate of – 0% and expected life – 5 years. The options vested immediately and the $245,385 fair value was recorded as share-based payment on the *Statement of Loss* for the six months ended June 30, 2018.

As at June 30, 2018, the Company had incentive stock options issued to directors, officers, employees and key consultants of the Company outstanding as follows:

Date of Grant	Options Outstanding[1]	Exercise Price ($)	Grant Date Fair Value ($)	Expiry Date	Weighted Average Remaining Contractual Life (years)
February 28, 2014	501,500	0.70	270,810	February 28, 2019	0.67
December 2, 2014	612,300	0.30	73,476	December 2, 2019	1.42
August 22, 2016	600,000	0.30	149,400	August 22, 2021	3.15
September 27, 2016	420,000	0.30	104,580	September 27, 2021	3.25
January 10, 2018	1,435,000	0.19	245,385	January 10, 2023	4.53
	3,568,800	**0.31**	**843,651**		**3.07**

[1] All options are exercisable.

(Expressed in Canadian Dollars)

13. RELATED PARTY TRANSACTIONS

a) *Remuneration of directors and the officers was as follows:*

	Three months ended June 30, 2018	Three months ended June 30, 2017	Six months ended June 30, 2018	Six months ended June 30, 2017
Salaries and benefits	61,062	41,294	$ 184,406	$ 95,181
Share-based payments	-	-	211,185	-
	61,062	**41,294**	**$ 395,591**	**$ 95,181**

For the three months ended June 30, 2018, the salaries and benefits amount above includes $23,562 (2017 - $19,844) for fees invoiced by a corporation controlled by the CFO of the Company for his services and $37,500 (2017 - $21,450) for fees invoiced by a corporation controlled by the CEO of the Company for his services as CEO.

For the six months ended June 30, 2018, the salaries and benefits amount above includes $79,406 (2017 - $52,281) for fees invoiced by a corporation controlled by the CFO of the Company for his services and $105,000 (2017 - $42,900) for fees invoiced by a corporation controlled by the CEO of the Company for his services as CEO. Also, included in accounts payable and accrued liabilities at June 30, 2018 is $9,081 (December 31, 2017 - $20,780) and $19,743 (December 31, 2017 - $nil) owed to corporations controlled by the CFO and CEO, respectively.

14. COMMITMENTS AND CONTINGENCIES

Flow-Through Obligation

As at June 30, 2018, the Company has to incur $252,118 in qualifying exploration expenditures by December 31, 2018 to meet its flow-through commitment. The Company keeps a separate bank account for the flow-through expenses to be incurred in a minimum amount equal to the flow-through obligation. At this time, management anticipates meeting that obligation and as a result, no additional provisions are required.

Environmental

The Company's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

Management Contract

The Company is party to a management contract. This contract requires that an additional payment of up to $500,000 be made upon the occurrence of certain events such as a change of control. As a triggering event has not taken place, the contingent payment has not been reflected in these interim condensed consolidated financial statements. The minimum commitment upon termination of this contract is $225,000. The minimum commitment due within one year under the terms of this contract is $150,000.

14. COMMITMENTS AND CONTINGENCIES (Continued)

Litigation

In May 2017, a former director of the Company filed a claim under the Toronto Small Claims Court in an amount of $23,720. In June 2017, the Company filed a Defense Statement as it believes the claim is without merit. The Company also filed a Defendant's Claim against the former director in the amount of $25,000 for breach of fiduciary duty, negligence and negligent misrepresentation. The Company attended court on June 21, 2018 and the judge had not rendered judgement in the matter as at August 29, 2018.

15. SUBSEQUENT EVENTS

On August 10, 2018, 4,670,400 warrants exercisable at $0.30 expired unexercised.

End of Notes to Financial Statements

MURCHISON MINERALS LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE THREE AND SIX MONTHS ENDED JUNE 30, 2018

This Management's Discussion and Analysis ("MD&A") is intended to supplement the condensed interim consolidated financial statements and notes of Murchison Minerals Ltd. (the "Company" or "Murchison") for the three and six months ended June 30, 2018. The unaudited condensed interim consolidated financial statements including comparative figures have been prepared by the Company in accordance with International Financial Reporting Standards ("IFRS") applicable to preparation of interim financial statements. This MD&A should be read in conjunction with the Company's audited consolidated financial statements and accompanying notes for the year ended December 31, 2017, which have been prepared in accordance with IFRS and available on the Company's web-site (www.murchisonminerals.com). This MD&A covers the most recently completed financial quarter and the subsequent period up to August 29, 2018. The information is presented in Canadian dollars unless stated otherwise.

OVERALL PERFORMANCE

Description of Business

Murchison is a Canadian based exploration company focused on the high-grade Brabant-McKenzie zinc-copper-silver deposit (the "Deposit") in north-central Saskatchewan. The Company also holds a 50% interest in the HPM nickel/copper/cobalt project in Quebec and holds gold claims in the Pickle Lake area of northwestern Ontario which are currently under option to White Metal Resources Corp. The Company expects to acquire additional properties as attractive opportunities are identified. The Company does not have any projects that generate revenue at this time. The Company's ability to carry out its business plan in the future rests entirely on its ability to secure equity and other financings or realize cash from the sale of assets.

Trends

The financing, exploration and development of any properties the Company holds or may acquire in the future will be subject to a number of factors including the commodity prices for minerals, applicable laws and regulations, political conditions, currency fluctuations, the hiring of qualified people, and obtaining necessary services in jurisdictions where the Company operates. The current trends relating to these factors could change at any time and negatively affect the Company's operations and business. Apart from these, the risk factors noted under the heading "Uncertainties and Risk Factors" and "Forward Looking Statement" included in MD&A for the year ended December 31, 2017, management is not aware of any other trends, commitments, events or uncertainties that would have a material effect on the Company's business, financial condition or results of operations.

OUTLOOK

The Company is currently completing an updated resource estimate for the Deposit which will incorporate approximately 9,004 metres in 19 holes from the 2018 drill program (the "Program"). The purpose of the Program was to continue advancing the development of the Deposit through potential resource expansion and to upgrade the current NI 43-101 inferred resource estimate into higher grade indicated category. Specifically, the Program was designed to test the robustness and predictability of the geological model in determining mineralization outside the known limits of the Deposit's previously reported resource estimate of 1.5 million indicated tonnes grading 7.46% zinc, 0.70% copper and 4.5 million inferred tonnes grading 5.99% zinc and 0.62% copper as outlined in the technical report filed on SEDAR, dated March 13, 2018 (the "Technical Report").

The results of the updated resource estimate are expected in September 2018 and will be used to further define the overall geological model in order to assist in designing next steps for the exploration program on the Deposit's advancement including additional follow-up drill programs. The Company plans to fully define the extents of the Deposit prior to applying economic parameters in order to determine its economic viability.

Regionally, the Company is focused on identifying additional deposits on the property and believes that in addition to the Deposit, the Brabant-McKenzie property exhibits what appears to be the potential for a VMS district or camp based on the number of known mineralized showings and geophysical anomalies identified along its 18 kilometre strike.

A field program of prospecting, mapping and sampling was completed on the south end of the property in July 2018 and included the investigation of mineralized showings on newly staked ground (see press release June 7, 2018) as part of the Company's efforts to systematically investigate known mineralized showings and identified geophysics anomalies. Initial observations were positive and the Company is currently compiling the data from this program with completion expected in September 2018. Results from this compilation will be used to further design next steps exploration which will include geophysics programs to further define additional potential drill targets.

Currently both the TOM2 and T2T geophysics anomalies, located approximately 6 kilometres south of the Deposit, are now defined as priority drill targets and will be tested in the Company's next drill program. Additionally, a ground electromagnetic ("EM") and magnetic ("Mag") geophysical program is underway on the Priority 3 airborne VTEM anomaly in order to better define its dimensions and conductivity. Results from this program are expected in early October 2018. Based on the results of this program, the Company also expects to test this target in the next drill program.

Results from the analysis of the drill program on Anomaly C and D (the "Anomalies") are expected in September 2018. These anomalies were grassroots targets and the Company undertook a full analysis of the results in order to provide context with respect to the Anomalies as well as the overall project development.

The Company has initiated a desktop compilation study of the historical data on its HPM nickel/copper/cobalt joint venture project in Quebec. The purpose of this study is to clarify previous work to date on this project and to design a formal ground truthing exploration program. Results from previous drill programs have been compelling and include drill intercepts of 43.18 metres grading 1.74% copper, 0.90% nickel, 0.90% cobalt, 15.06 metres grading 1.72% copper, 0.66% nickel, 0.89% cobalt and 5.47 metres grading 0.97% copper, 2.37% nickel, 1.23% cobalt. The Company plans to use the results of this ground truthing exploration program to design a formal exploration program in order to identify viable drill targets and to continue advancing this project. The initial compilation is expected to be completed in the fall of 2018.

MINERAL PROPERTIES – EXPLORATION ACTIVITIES

Brabant Property – Saskatchewan

The Brabant property is owned 100% by Murchison and is strategically located along Highway 102 approximately 175 kilometres northeast of the town of La Ronge and near major infrastructure, including grid power. The Brabant property consists of the Deposit and numerous additional zinc and copper occurrences and geophysical anomalies over approximately 17 kilometre strike of favourable geological horizon, all of which remain under-explored and mostly untested. The Project area shares geological characteristics, including similar age, with the Flin Flon volcanogenic massive sulphide (VMS) mining camp in Manitoba.

In October 2017, (with minor revisions on March 13, 2018), Murchison published an updated NI 43-101 mineral resource estimate (the "Estimate") which is reflected in the table below.

Category	Tonnes	Zn%	Cu%	Pb%	Ag (g/t)	Zn Eq%
Indicated	1,500,000	7.46	0.70	0.39	31.2	10.01
Inferred	4,500,000	5.99	0.62	0.28	19.4	7.99

The Estimate for the Deposit was determined on the basis of:

- Drilling results to March 21, 2017 and including historical diamond drilling used in the previous NI-43-101 resource estimate completed in 2008;
- US$ metal prices of $1.20/lb Zn, $2.50/lb Cu, $1.00/lb Pb, $16.00/oz Ag and $1,200/oz Au;
- CDN$:US$ exchange rate of $1.10;
- An NSR cut-off of $110/tonne or 5% Zn equivalent based on above metal prices;
- Average metallurgical and payable recovery of 75% for all metals;
- Indicated Resources were calculated using a two-hole minimum and a maximum distance of 30 m from a diamond drill hole; and
- Inferred Resources were calculated using a no-hole minimum and a minimum of 30 m and a maximum distance of 60 m from a diamond drill hole was used for inferred.

On June 25, 2018, the Company announced the results of its 2018 winter diamond drilling program (the "Program") on the Deposit where 19 holes (9,004 metres) were completed.

The highlights of the Program were:

- Mineralization intercepted in all 19 completed drill holes
- Known limits of mineralization extended
- Results continue to demonstrate high-grade nature and continuity of mineralization
- Developing new polymetallic zone identified above main mineralized zones
- Multiple zones of mineralization encountered
- Additional drill targets identified for potential tonnage additions to resources

The Program was designed to test the robustness and predictability of the geological model in determining mineralization outside the known limits of the Deposit's previously reported resource estimate and focused on testing the peripheral edges and infill drilling in areas of missing information identified within the Deposit in order to potentially expand the tonnage of the current inferred resource and, where possible, infill and upgrade inferred resources to the indicated category. The Program was also designed to, where possible, identify and test possible higher grade areas of the Deposit including a newly identified polymetallic zone located stratigraphically above the main mineralized zones.

The Program was based on down hole geophysics and the new geological model and utilized 3 drill pads (A, B and C) established in the 2017 drill program (Figure 1). Volcanogenic massive sulphide (VMS) style zinc-copper mineralization was intersected in all diamond drills holes with the exception of hole BM18-001A which was abandoned at 61 metres due to excessive deviation (Table 1).

Figure 1 – 2018 Brabant-McKenzie Project Drill Hole Location

Length density weighted intercepts. Holes were drilled to attempt intercept perpendicular to lens/mineralization. Actual true thickness may be less than intercepts reported. ZnEq is based on zinc = $1.20/lb, copper = $2.50/lb, lead = $1.00/lb and silver = $16/oz. For drill hole locations, refer to Table 2 of press release dated June 25, 2018.

PAD A
NORTHERN DEPOSIT EXTENT
Four holes were drilled from Pad A and focused on the untested northern edge of the Deposit. All holes continued to demonstrate the zonation of elevated copper values in this area of the Deposit.

BM18-010 intersected 11.66 metres of 2.37% zinc, 0.72% copper and 28.68 g/t silver (4.88% ZnEq) including 3.24 metres of 5.12% zinc, 0.83% copper and 19.05 g/t silver (7.25% ZnEq).

BM18-011 intersected 5.34 metres of 2.10% zinc, 1.69% copper and 32.18 g/t silver (6.26% ZnEq).

Additionally, BM18-15 and BM18-16 continued to show the continuity of the mineralizing system with significant zinc grade intercepts including 19.70% zinc over 0.47 metre, 12.30% zinc over 0.36 metre and 11.00% zinc over 0.42 metre.

PAD B
Six diamond drill holes were drilled from Pad B to test the central, lateral extent of the Deposit to the south as well as a newly identified polymetallic zone. This zone could not be included in the Technical Report's resource estimate because the continuity of the mineralization was not completely understood. All diamond drill holes intersected mineralization, usually in several zones and all continued to demonstrate the predictability and apparent continuity of the mineralizing system of the Deposit.

DEPOSIT CENTRAL LATERAL EXTENT
BM18-013 encountered multiple zones of mineralization including 3.00 metres of 4.50% zinc, 0.36% copper and 16.14 g/t silver (5.65% ZnEq).

Additional intercepts included:
- 0.3 metre of 12.80% zinc, 0.17% copper, 6.30 g/t silver (13.75% ZnEq)
- 1.00 metre of 3.34%, 1.14% copper, 24.70 g/t silver (6.21% ZnEq)

BM18-012 intercepted multiple high-grade intercepts of zinc and copper, including:
- 0.67 metre of 12.10% zinc, 0.64% copper, 16.00 g/t silver (13.75% ZnEq)
- 3.16 metres of 1.00% zinc, 1.24% copper, 34.16 g/t silver (4.27% ZnEq)
- 0.99 metre of 7.37% zinc, 0.43% copper, 19.17 g/t silver (8.69% ZnEq)

POLYMETALLIC ZONES
Diamond drill holes BM18-017, BM18-018, BM18-019 tested the polymetallic zone and encountered extensive mineralization in all three holes.

BM18-019 encountered of 6.37 metres of 12.53% zinc, 0.70% copper and 42.03 g/t silver (14.97% ZnEq).

BM18-017 intercepted multiple zones of high-grade mineralization including:
- 5.40 metres grading 6.35% zinc, 0.68% copper, 63.09 g/t silver (9.39% ZnEq)
- 4.00 metres of 8.11% zinc, 0.47% copper, 72.62g/t silver (11.06% ZnEq)

BM18-018 intercepted 1.80 metres of 11.89% zinc, 1.09% copper, 67.18 g/t silver (15.82% ZnEq)

PAD C
Pad C was set up to test the southern down dip portion of the Deposit and add definition between previous widely spaced drill holes. A total of eight diamond drill holes were completed from this pad.

DEPOSIT DOWN DIP INFILL
Holes BM18-001, BM18-002, BM18-007, BM18-008, BM18-009 infilled the potential down dip extension of known mineralization in the area previously identified during the 2017 diamond drill program.

As predicted in the geological model and confirmed by drilling, the continuity and high-grade nature of the mineralization continues to be demonstrated to depth. Specifically, drilling confirmed that the mineralization encountered at 950 metres down dip in the 2017 drilling appears contiguous with the main Deposit.

BM18-008 focused on a high-grade mineralized corridor identified in the geological model and successfully confirmed its down dip extent by intersecting 2.61 metres grading 10.95% zinc and 0.52% copper, 11.86 g/t silver (12.26% ZnEq).

BM18-009 intersected 10.78 metres grading 1.58% zinc, 0.48% copper, 12.75 g/t silver (2.83% ZnEq) which included high-grade intercepts of 1.56 metres of 1.85% zinc, 1.41% copper, 37.11 g/t silver (5.52% ZnEq) and 1.68 metres of 3.14% zinc, 0.85% copper, 22.71 g/t silver (5.38% ZnEq).

High-grade intercepts encountered in BM17-007 include 0.36 metre of 10.90% zinc, 0.63% copper, 14.30 g/t silver (12.50% ZnEq) and 0.40 metre 7.24% zinc, 0.06% copper, 9.28g/t silver (7.57% ZnEq).

DEPOSIT SOUTHERN LATERAL EXTENT
Diamond drill holes, BM18-003, BM18-004 and BM18-005 were drilled to test the lateral extent of the Deposit to the sile all holes intersected mineralization, results currently suggest the limit of the Deposit is defined in this area.

The drilling results for Anomaly C and Anomaly D should be published within a few weeks.

For the three and six months ended June 30, 2018, the Company incurred respectively $167,516 (Q2/17 - $50,605) and $2,085,238 (2017-$969,692) in exploration expenses on the Brabant property.

BRABANT-McKENZIE PROJECT REGIONAL EXPLORATION
The Company announced that it is continuing to expand its regional review of mineralized showings on the property and surrounding area. The Company has recently staked an additional 1,301 hectares of ground adjacent to and southeast of the current property in order to cover prospective geology and reported mineralized showings hosting anomalous copper and zinc values

New Claims
The Company staked claims numbered MC00011056 adjacent to the property which covers previous work outlined in Saskatchewan Mineral Deposit Index ("SMDI") 0429 assessment report ("SMDI 0429"). As noted in the assessment report the area, "hosts a sulphide zone that was traced for a length of 2,000 ft (609.6 m) over widths of up to 20 ft (6.1 m). Several trenches along the zone expose rusty weathered quartz feldspar actinolite gneiss containing abundant pyrrhotite and graphite and a small amount of chalcopyrite. The sulphide mineral content ranges from about 60% to over 90%. Within this zone a showing consisting of a sulphide lens hosting pyrite, pyrrhotite and minor sphalerite and covering an area of 2 ft by 30 ft (0.6 x 9.1 m) is noted. One sample of massive pyrrhotite from the showing gave 0.36% Cu."

Other showings noted in SMDI 0429 and located within MC00011056 include:

- "A 2,400 x 500 ft (731.5 x 152.4 m) northeast trending fine grained pyrrhotite zone containing low (anomalous) copper and zinc values was identified on the east shore of Brabant Lake."
- "A sulphide lens hosting pyrite, pyrrhotite and minor sphalerite and covering an area of 2 ft by 30 ft (0.6 x 9.1 m). One sample of massive pyrrhotite from the showing gave 0.36% Cu."

- "Several boulders 2 to 4 ft (0.6 to 1.2 m) in diameter at the south end of the zone, consisting of essentially of massive pyrrhotite with abundant graphite and scattered irregular grains of chalcopyrite."
- "[Trench no. 4] is approximately 1,400 ft (426.7 m) to the east of the Brabant Lake shore which exposed a 20 ft. (6.1 m) width of nearly massive sulphides pyrrhotite-pyrite + minor chalcopyrite and wurtzite (associated with pyrite and sphalerite) and graphite. Wurtzite and hydrozincate were noted in association with pyrite but not with pyrrhotite. Several assays gave 0.25% Cu. Mineralized float from the showing area assayed 0.24% Cu."

The Company also staked claims numbered MC00011057 approximately 2.0 kilometres southeast of the property based on showings noted in SMDI 0436 assessment report. It notes the identification of "showings that host chalcopyrite associated with pyrrhotite in schistose rocks. Chalcopyrite makes up a much higher proportion of the sulphides than in other type of sulphide zones." The Company does not know of any follow up work that has been conducted on this showing since the initial discovery in 1969.

All mineralized values noted are historical only and have not been verified by Murchison.

Murchison completed a regional summer prospecting, sampling and mapping program including over the showings on the newly staked ground, to further define their potential as exploration targets as the Company worked to demonstrate the VMS potential of the area. The Company also be conducted additional prospecting, sampling and mapping over the TOM2, T2T, Priority 3 geophysical anomalies in order to further define these anomalies as drill targets.

Priority 3 Geophysics Anomaly Update

The Company received the permits and work has been initiated on a ground electromagnetic and magnetometer geophysical survey on the Priority 3 VTEM airborne anomaly. Additionally, it has selected a geophysical contractor to undertake the survey. The Company expects to receive results of this survey in early October 2018.

Qualifying Statement

The foregoing scientific and technical disclosures have been reviewed and approved by Kent Pearson, P. Geo., and Finley Bakker, P. Geo., who are qualified persons as defined by National Instrument 43-101. Mr. Bakker is an independent consultant to Murchison and the Brabant-McKenzie project. Mr. Pearson is President and Chief Executive Officer of the Company.

HPM Property – Quebec

The HPM project is a 50:50 joint venture with Pure Nickel Inc. No exploration activities were conducted on the HPM project during the three months ended June 30, 2018. For the six months then ended, the Company incurred $720 (2017 - $823) in claim maintenance and renewal expenses for the HPM project.

Pickle Lake Properties – Ontario

On July 4, 2016, (with amendment on February 2, 2017), the Company entered into an Agreement with White Metal Resources Corp. ("White Metal") whereby White Metal can acquire all of the Company's 51% interest ("Earned Interest") in its Pickle Lake Gold properties (the "Properties"). White Metal may exercise the option (the "Option") and acquire the Earned Interest by completing expenditures and making cash payments.

Upon completion of the Option Payments and Expenditures, White Metal will deliver a notice to the Company (the "Option Notice") setting out that it has exercised the Option, and the date of the Option Notice shall be deemed to be the date in which White Metal's Earned Interest in the Properties pursuant to the Option shall be effective, subject to the Murchison's NSR.

On April 7, 2017, White Metal assigned its option and right to acquire the Earned Interest to Ardiden Ltd., an Australian exploration company.

Qualified Persons

Exploration programs at the Company's project in Saskatchewan are being carried out under the supervision of Kent Pearson, P. Geo., Finley Bakker, P. Geo.,and Martin St-Pierre, P. Geo., "Qualified Persons" as defined by National Instrument 43-101. Mr. Bakker and Mr. St-Pierre are independent consultants to Murchison and the Project. Mr. Pearson is President and Chief Executive Officer of Murchison. Mr. Pearson, Mr. Bakker and Mr. St-Pierre have supervised the preparation of, and confirmed all of the scientific and technical disclosure in this MD&A.

Access to Properties

The Company's access to its Canadian properties is dependent on climate and weather conditions. The Brabant property in Saskatchewan is accessible all year round. Typically, properties in Ontario are generally accessible all year round. All projects in Québec can be accessed from January to September as weather limits the activities during other times of the year.

RESULTS OF OPERATIONS

For the six months ended June 30, 2018, the Company incurred a loss of $1,917,104 (2017 - $794,340). The increase of $1,122,764 is mainly related to the following factors: **1.** higher exploration expenses of $1,115,443 (2018 - $2,085,958 vs 2017 - $970,515) as the Company completed a 12,431-metre drill program in Q1/18 compared to 5,653 metre program a year earlier at the Project in Saskatchewan; **2.** higher share-based payments of $245,385 (2018 - $245,385 vs 2017 - $nil) as the Company granted stock options in January 2018. **3.** higher management fees and salaries of $89,225 (2018 - $184,406 vs 2017 - $95,181) related to $50,000 paid in bonuses and the increase in the CEO's compensation to reflect the full time nature of the position; **4.** higher professional fees of $75,593 (2018 - $99,100 vs 2017 - $23,507) directly to the court case disclosed in note 14 of the financial statements; **5.** higher investor relations expense of $39,677 (2018 - $84,941 vs 2017 - $45,264) as the Company attended more conferences in Q2/18 **6.** higher regulatory and transfer agent expense of $35,910 (2018 - $47,324 vs 2017 - $11,414) directly related to the TSXV listing in Q1/18, offset by; **7.** higher non-cash flow-through shares premium of $464,755 (2018 - $807,516 vs 2017 - $342,761) as the Company recognized the income based on the higher level of exploration activities in Canada in S1-2018.

For the six months ended June 30, 2018, exploration expenses totaled $2,085,958 (2017 - $970,515) with $2,085,238 (2017 - $969,692) at Brabant in Saskatchewan and $720 (2017 - $823) in claims renewal at HPM in Quebec.

For the three months ended June 30, 2018, the Company incurred a loss of $286,004 (Q2/17 - $84,011). The increase of $201,993 is mainly related to the following factors: **1.** higher exploration expenses of $116,911 (Q2/18 - $167,516 vs Q2/17 - $50,605) as the Company completed geophysical surveys at the Project; **2.** higher professional fees of $77,587 (Q2/18 - $87,134 vs Q2/17 - $9,547) directly to the court case disclosed in note 14 of the financial statements; **3.** higher management fees and salaries of $19,768 (Q2/18 - $61,062 vs Q2/17 - $41,294) mainly related to the increase in the CEO's compensation to reflect the full time nature of the position, offset by; **4.** higher non-cash flow-through shares premium of $46,618 (Q2/18 - $63,022 vs Q2/17 - $8,546) as the Company recognized the income based on the exploration activities in Q2/18.

For the quarter ended June 30, 2018, exploration expenses totaled $167,516 (Q2/17 - $50,605) with all being incurred at Brabant in Saskatchewan.

SUMMARY OF QUARTERLY RESULTS

	Second Quarter 2018	First Quarter 2018	Fourth Quarter 2017	Third Quarter 2017
	$	$	$	$
Total Assets	2,023,442	2,972,594	4,439,525	1,088,054
Current Assets	2,019,567	2,968,676	4,434,186	1,082,241
Non-current Assets	3,875	3,918	5,339	5,813
Total Liabilities	283,988	947,136	1,028,352	96,624
Interest Income	5,335	9,653	2,751	1,820
Loss	286,004	1,631,100	253,719	131,747
Loss Per Share (1)	0.01	0.04	0.01	0.01

	Second Quarter 2017	First Quarter 2017	Fourth Quarter 2016	Third Quarter 2016
	$	$		
Total Assets	1,264,424	1,454,540	$2,391,094	$2,608,713
Current Assets	1,258,470	1,447,478	$2,383,774	$2,313,993
Non-current Assets	5,684	7,062	$7,320	$294,720
Total Liabilities	141,247	247,352	$473,577	$495,259
Interest Income	1,827	4,203	$4,699	$1,369
Loss (profit)	84,011	710,329	$195,937	$382,853
Loss Per Share (1)	0.00	0.03	$0.01	$0.02
(l) Loss per share remains the same on a diluted basis				

Due to the nature of the business, the cash balance and short-term investments generating interest income are subject to fluctuations from quarter to quarter. The timing of equity financing and ensuing exploration and operating expenses are the main factors affecting the level of funds invested from time to time. The variation in interest rates also has an impact on the interest income.

In Q1-2018, the Company completed a 12,431-metre drill program along with geophysical surveys at the Project in Saskatchewan at a cost of $1,917,722. In Q4-2017, the Company completed a non-brokered private placement of units and flow-through shares for gross proceeds of $3,839,189 which triggered the recognition of $905,490 in non-cash flow-through share liability. In Q1-2017, the Company was actively drilling at the Project in Saskatchewan and incurred $919,910 in exploration. This amount was offset by $326,357 of non-cash flow-through share premium. In Q3-2016, the Company completed a non-brokered private placement in two tranches for net proceeds of $2.4 million. This had a direct impact on the interest income as well as total current assets and total assets. Also in Q3, 2016, the Company granted stock options to its directors, officers and consultants which generated a non-cash share-based payment expense of $266,430. In Q2-2016, the profit of $7,246 is a direct result of a $33,514 gain on sale of assets held in Africa combined with lower management fees as the CEO and CFO provided services to the Company without compensation during the quarter.

LIQUIDITY AND CAPITAL RESOURCES

As at June 30, 2018, the Company had no debt, cash of $1,976,322 and working capital (excluding flow-through share liability) of $1,833,553 (December 31, 2017 – $4,394,940 and $4,311,324, respectively). The Company's excess cash, when available, is deposited into interest-bearing accounts or invested in redeemable GICs with major Canadian chartered banks.

As at June 30, 2018, the Company had amounts receivable and prepaid expenses totaling $43,245 which included sales tax receivable of $34,291 and prepaid expenses of $8,954.

The June 30, 2018, condensed interim consolidated financial statements were prepared in accordance with accounting principles applicable to a going concern, which assumes that the Company will be able to realize its assets and discharge liabilities in the normal course of business. The Company's ability to continue as a going concern is always dependent on its ability to raise new funds to meet its obligations and continue its exploration activities.

Equity Financing

The Company's exploration projects are at an early stage and it has not yet been determined whether any of its properties contain economically recoverable ore. As a result, the Company has no current sources of revenue and has relied on the issuance of shares to generate the funds required to further its projects.

Stock Options

In January 2018, the Company granted 1,435,000 stock options exercisable at $0.19 to its officers, directors and key consultants. The options are for a period of 5 years and vested immediately.

Warrants

In On August 10, 2018, 4,670,400 warrants exercisable at $0.30 expired unexercised.

General

The Company's ability to successfully acquire mineral projects or recover amounts expended on mineral properties is conditional on its ability to secure financing when required. The Company expects to meet additional financing requirements through equity financing. The Company may seek other alternatives for financing in the future depending on market conditions and exploration results; however, there can be no assurance that such financing attempts will be successful. The impact on our business and the cost and availability of financing remain uncertain and could affect our overall liquidity.

Commitments and Obligations

As at June 30, 2018, the Company had to incur $252,118 in qualifying exploration expenditures by December 31, 2018 to meet its flow-through commitment.

The Company is party to a management contract. This contract requires that an additional payment of up to $500,000 be made upon the occurrence of certain events such as a change of control. As a triggering event has not taken place, the contingent payment has not been reflected in these condensed interim consolidated financial statements. Minimum commitment upon termination of this contract is $225,000. Minimum commitment due within one year under the terms of this contract is $150,000.

In May 2017, a former director of the Company filed a claim under the Toronto Small Claims Court in an amount of $23,720. In June 2017, the Company filed a Defense Statement as it believes the claim is without merit. The Company also filed a Defendant's Claim against the former director in the amount of $25,000 for breach of fiduciary duty, negligence and negligent misrepresentation. The Company attended court on June 21, 2018 and the judge had not rendered judgement in the matter as at August 29, 2018.

The Company's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

The Company has no long-term contractual obligations.

OFF-BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements.

TRANSACTIONS WITH RELATED PARTIES

a) Remuneration of directors and the officers was as follows:

	Three months ended June 30,		Six months ended June 30,	
	2018	2017	2018	2017
Salaries and benefits	61,062	41,294	$ 184,406	$ 95,181
Share-based payments	-	-	211,185	-
	61,062	**41,294**	**$ 295,591**	**$ 95,181**

For the three months ended June 30, 2018, the salaries and benefits amount above includes $23,562 (2017 - $19,844) for fees invoiced by a corporation controlled by the CFO of the Company for his services and $37,500 (2017 - $21,450) for fees invoiced by a corporation controlled by the CEO of the Company for his services as CEO.

For the six months ended June 30, 2018, the salaries and benefits amount above includes $79,406 (2017 - $52,281) for fees invoiced by a corporation controlled by the CFO of the Company for his services and $105,000 (2017 - $42,900) for fees invoiced by a corporation controlled by the CEO of the Company for his services as CEO. Also, included in accounts payable and accrued liabilities at June 30, 2018 is $9,081 (December 31, 2017 - $20,780) and $19,743 (December 31, 2017 - $nil) owed to corporations controlled by the CFO and CEO, respectively.

PROPOSED TRANSACTIONS

The Company continues to evaluate quality exploration projects and financing opportunities. There are no transactions currently pending.

CHANGES IN ACCOUNTING POLICIES

IFRIC 23 – Uncertainty Over Income Tax Treatments ("IFRIC 23") was issued in June 2017 and clarifies the accounting for uncertainties in income taxes. The interpretation committee concluded that an entity shall consider whether it is probable that a taxation authority will accept an uncertain tax treatment. If an entity concludes it is probable that the taxation authority will accept an uncertain tax treatment, then the entity shall determine taxable profit (tax loss), tax bases, unused tax losses and credits or tax rates consistently with the tax treatment used or planned to be used in its income tax filings. If an entity concludes it is not probable that the taxation authority will accept an uncertain tax treatment, the entity shall reflect the effect of uncertainty in determining the related taxable profit (tax loss), tax bases, unused tax losses and credits or tax rates. IFRIC 23 is effective for annual periods beginning on or after January 1, 2019. Earlier adoption is permitted. At January 1, 2018, the Company adopted this amendment and there was no material impact on the Company's condensed interim consolidated financial statements.

FINANCIAL INSTRUMENTS

	June 30 2018	December 31 2017
Financial assets:		
Loans and receivables		
Cash and cash equivalents	$ 1,976,322	$ 4,394,940
Amounts receivable	-	-
FVTPL		
Investments	3,875	5,339
Financial liabilities:		
Other financial liabilities		
Accounts payable and accrued liabilities	$ 186,014	$ 122,862

As of June 30, 2018 and December 31, 2017, the fair value of all the Company's financial instruments approximates the carrying value, due to their short-term nature, except as for the investment which is presented at fair value.

As at June 30, 2018, the Company's financial instrument *Investment* on the condensed interim consolidated statements of financial position was recorded at level 1 with a fair value of $3,875 (December 31, 2017 - $5,339).

Significant accounting judgments and estimates:
The preparation of condensed interim consolidated financial statements in conformity with IFRS requires the Company's management to make judgments, estimates and assumptions about future events that affect the amounts reported in the condensed interim consolidated financial statements and related notes to the financial statements. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results may differ from those estimates.

The areas that require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to the following:

- ***Assets' carrying values and impairment charges***
  In the determination of carrying values and impairment charges, management looks at the higher of recoverable amount or fair value less costs to sell in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.

- ***Income and other taxes***
  Income tax on the profit or loss for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

  Current tax expense is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

  Deferred tax is provided using the statement of financial position liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: goodwill not deductible for tax purposes and the initial recognition of assets or liabilities that affect neither accounting nor taxable profit. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the financial position reporting date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized.

- ***Share-based payments***
  Management determines costs for share-based payments using market-based valuation techniques. The fair value of the market-based and performance-based non-vested share awards are determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgments used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviors and corporate performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates. The Company currently estimates the expected volatility of its common shares based on historical volatility taking into consideration the expected life of the options and warrants.

Capital Management:

The Company manages its capital with the following objectives:

- to ensure sufficient financial flexibility to achieve the ongoing business objectives including funding of future growth opportunities, and pursuit of accretive acquisitions and

- to maximize shareholder return through enhancing the share value.

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company may manage its capital structure by issuing new shares, repurchasing outstanding shares, adjusting capital spending, or disposing of assets. The capital structure is reviewed by Management and the Board of Directors on an ongoing basis.

The Company considers its capital to consist of equity, comprising share capital, reserves and deficit. The Company manages capital through its financial and operational forecasting processes. The Company reviews its working capital and forecasts its future cash flows based on operating expenditures, and other investing and financing activities. The forecast is regularly updated based on its exploration and development activities. Selected information is regularly provided to the Board of Directors of the Company. The Company's capital management objectives, policies and processes have remained unchanged during the quarter ended June 30, 2018 and the year ended December 31, 2017. The Company is not subject to any capital requirements imposed by a regulator or lending institution.

ADDITIONAL INFORMATION

Outstanding Shareholders' Equity Data
As of August 29, 2018, the following are outstanding:

• Common Shares	42,543,214
• Stock Options	3,568,800
• Warrants	8,567,570

Uncertainties and Risk Factors

An investment in the securities of the Company is highly speculative and involves numerous and significant risks. Such investment should be undertaken only by investors whose financial resources are sufficient to enable them to assume these risks and who have no need for immediate liquidity in their investment. Prospective investors should carefully consider the risk factors that have affected, and which in the future are reasonably expected to affect, the Company and its financial position.

In addition to the risks outlined the December 31, 2017 annual MD&A, Murchison has identified the extreme volatility occurring in the financial markets as a significant risk for the Company. As a result of the market turmoil, investors are moving away from assets they perceive as risky to those they perceive as less so. Companies like Murchison are considered risk assets and as mentioned above are highly speculative. The volatility in the markets and investor sentiment may make it difficult for the Company to access the capital markets to raise the funds required for its future expenditures.

FORWARD-LOOKING STATEMENTS

This document contains forward-looking statements based on the Company's current expectations. Forward-looking information can often be identified by forward looking words such as "anticipate", "believe", "expect", "goal", "plan", "intend", "estimate" or similar words suggesting future outcomes, or other expectations, beliefs, plans, objectives, assumptions, intentions or statements about future events or performance.

These forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from those presented in this document. Accordingly, the Company undertakes no obligation to update forward-looking statements if circumstances or management's estimates or opinions should change, unless required by law. Readers are cautioned not to place undue reliance on forward-looking information.
